

GAUTAM PRASAD

Quantitative Risk & Financial Analytics
Bengaluru, India | +91 9142056719 | [Email](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

MSc Quantitative Finance graduate with applied experience in market risk, counterparty credit risk (CVA), and derivatives pricing. Skilled in Python, R, and SQL, with hands-on work in volatility modelling (GARCH-LSTM), Monte Carlo simulation, VaR, and financial modelling. Seeking Quantitative Risk / Market Risk / Credit Risk roles.

WORK EXPERIENCE

Finance Analyst | All For Expo | Poznan, Poland

Sep 2025 - Feb 2026

- Developed **Power BI KPI dashboards** tracking project performance and key financial metrics
- **Automated Excel** reporting and data validation processes, improving efficiency and accuracy
- Analysed project expenses and prepared monthly reports supporting budgeting and management decisions
- Processed and reconciled **500+ invoices** monthly, ensuring accurate and compliant financial records
- Collaborated with **40+ vendors and stakeholders** to resolve payment, documentation, and operational issues
- Coordinated with clients and business partners across the **USA, Dubai, and Europe**

EDUCATION

Master of Science in Quantitative Finance | GPA: 4.68/5 | Rector's Scholarship - Top 10%

Poznan University of Economics and Business | Poland

2024-2026

Bachelor in Computer Science and Engineering | CGPA: 8.51 / 10

Chandigarh University | India

2020 -2024

KEY SKILLS

Programming & Analytics

Python · R · SQL · Excel/VBA · Power BI · Git · Statistical Modelling · Data Analysis

Risk & Quantitative Finance

Market Risk · Credit Risk · Counterparty Credit Risk · CVA · Value-at-Risk (VaR) · Expected Shortfall · Backtesting · Stress Testing · Risk Modelling · Monte Carlo Simulation · Volatility Modelling · GARCH

Derivatives & Financial Modelling

Derivatives Pricing · Financial Econometrics · Time Series Analysis · Financial Modelling · DCF Valuation · WACC · Scenario Analysis · Sensitivity Analysis

Financial Analysis

Financial Statement Analysis · Forecasting · KPI Reporting · Risk Analytics

PROJECTS

Hybrid GARCH-LSTM Volatility Forecasting | Python

- Developed and compared GARCH, LSTM, and hybrid GARCH-LSTM models for equity volatility forecasting across Germany, USA, India, and Poland (MSc thesis) on 10+ years historical data.

Counterparty Credit Risk & CVA | R · Monte Carlo

- Built Monte Carlo CVA model (10,000 paths, 3-year horizon) to quantify counterparty exposure; netting reduced CVA by 18.2%, monthly collateral by 81.5%

Asian Option Pricing | Python · Derivatives

- Developed Monte Carlo pricing engine for arithmetic Asian options using geometric-average control variate to improve pricing efficiency

Corporate Bankruptcy Prediction | Credit Risk Modelling

- Built and validated multiple statistical default prediction models to estimate corporate probability of default from financial statement data
